DRIED FRUIT

## | Our Company

**We are producers of raisins and prunes since 2019 and producers of grapes for raisins since 2021**

### About us

We are Atacama Dried Fruit.

From Chile, we export premium quality dried fruit and nuts, such as: raisins, prunes, walnuts, almonds and dried cherries.

Our business model focuses on people. Every single element of our value chain: our work team, suppliers and customers are part of a committed long-term relationship based on solid human values. In ADF, we passionately

believe that is the way of doing business.

Everything we do has a clear and responsible social purpose; promote a healthy lifestyle, respect the environment, support and finance local growers (fair trade extra!), and sustainable development. The goal is the path, always looking to improve ourselves and those around us.
