

ATACAMA

DRIED FRUIT & NUTS

Our Passion is people

| Our Company

We are producers of raisins and prunes since 2019 and producers of grapes for raisins since 2021

About us

We are Atacama Dried Fruit.

From Chile, we export premium quality dried fruit and nuts, such as: raisins, prunes, walnuts, almonds and dried cherries.

Our business model focuses on people. Every single element of our value chain: our work team, suppliers and customers are part of a committed long-term relationship based on solid human values. In ADF, we passionately

believe that is the way of doing business.

Everything we do has a clear and responsible social purpose; promote a healthy lifestyle, respect the environment, support and finance local growers (fair trade extra!), and sustainable development. The goal is the path, always looking to improve ourselves and those around us.
